PROFESSIONAL SUMMARY

Computer Science student (6th Semester, BSCS) at the University of Central Punjab with hands-on experience as a Full Stack Developer Intern building responsive web and mobile applications using Flutter, React, Node.js, Express, and MongoDB. Skilled in Android development, on-page SEO, and RESTful API integration, with a track record of independently designing and deploying a production agency website and multiple functional Android applications. Experienced in Agile workflows, Git version control, and cross-functional collaboration. Seeking an internship or entry-level role to apply full-stack development skills to deliver real, working software.

CORE SKILLS

Programming Languages: C, C++, Java, JavaScript, SQL, HTML5, CSS3, XML

Full Stack / MERN Development: MongoDB, Express.js, React, Node.js, RESTful APIs, Flutter, Responsive Design

Android Development: Android Studio, Java, SQLite, Firebase Realtime Database, Firebase Cloud Storage, Material Design

Web Development: HTML5, CSS3, JavaScript (Vanilla), On-Page SEO

Computer Science Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms, File Handling, Database Management, UI/UX Design

Tools & Platforms: Git, GitHub, Agile/Scrum, Figma, VS Code, Keyword Research, Copywriting

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern

2026 – Present

SpatioLense | Remote

- Develop responsive web and mobile application features using Flutter, React, and modern JavaScript frameworks.
- Build and integrate RESTful APIs with frontend applications to support core product functionality.
- Design and implement scalable backend services using Node.js and Express.
- Work with MongoDB for data modeling, storage, and management.
- Collaborate with designers and developers in an Agile development environment, participating in sprint planning and code reviews.
- Use Git for version control and team collaboration.
- Debug, test, and optimize applications for performance and reliability.

Web Developer & SEO Specialist

2025 – Present

BytesStack Software Solutions | Remote / Lahore, Pakistan

- Designed and developed the complete agency website from scratch, including layout, UI/UX, and front-end implementation using HTML, CSS, and JavaScript.
- Wrote all website copy, including the homepage, service pages, and about section, using a conversion-focused brand tone.
- Executed a full on-page SEO strategy: keyword research, meta titles and descriptions, heading hierarchy (H1-H3), image alt tags, and internal linking.
- Optimized site structure and content for search engine discoverability, targeting high-intent keywords relevant to the agency's services.

Content Writing Intern

June 2024 – August 2024

Haachi Technologies

- Researched and wrote SEO-optimized blog posts and articles across multiple topics, following editorial guidelines and brand tone.
- Conducted keyword research to identify relevant, high-intent search terms and incorporated them naturally into written content.
- Optimized articles for on-page SEO, including heading structure, keyword density, and meta description writing.
- Collaborated with the editorial team to meet content deadlines and deliver publication-ready pieces.

IT Technician

2024

Jers Consultancy (Pvt) Ltd

- Installed, configured, and troubleshoot hardware and software systems, including desktops, printers, and LAN networks.
- Performed system updates, data backups, diagnostics, and OS reinstallations to maintain operational uptime.
- Resolved technical issues efficiently, minimizing downtime for office staff and management.

PROJECTS

Budgetly — Personal Finance & Budget Tracker

2025

- Built a budget tracking web application using the MERN stack (MongoDB, Express.js, React, Node.js) as part of university coursework.
- Implemented features to track income, expenses, and budget categories with a dashboard interface.

TestCraft — Online Quiz & Test Creation Platform

2025

- Developed a MERN stack platform enabling educators to create question banks, schedule tests, and track student results.
- Designed the data model and front-end interface for test creation and results tracking.

InstaClone — Social Media Application

2024

- Developed a feature-complete Instagram clone using Java and Android Studio, including user authentication, photo upload, real-time feed, and follow/unfollow functionality.
- Integrated Firebase Realtime Database and Firebase Cloud Storage for backend data and media management.

PakWheels Clone — Vehicle Marketplace Application

2024

- Built an Android vehicle listing application with browse, search/filter, and user authentication using Java, SQLite, and Material Design.

Hospital Management System

2023

- Built a console-based C++ system covering patient registration, appointment scheduling, invoice generation, and CSV-driven rate lists using OOP and file handling.

Car Rental Management System

2023

- Developed a menu-driven C++ application using arrays and stacks for inventory, booking, and returns, with persistent file-based record storage.

Personal Portfolio Website

2024

- Designed and built a personal portfolio website using HTML, CSS, and JavaScript with SEO-friendly, semantic structure.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

2023 – Present

University of Central Punjab (UCP), Lahore — 6th Semester, Currently Enrolled

Intermediate (ICS) — Physics, Mathematics, Computer Science

2021 – 2023

Government College University (GCU), Lahore

CERTIFICATIONS

- Web Designing — FSDS, Government College University (GCU), Lahore
- Amazon Virtual Assistant (VA) — FSDS, Government College University (GCU), Lahore
- MicroPython Workshop — IET On Campus, UET Lahore
